

# pPodLite Self-Contained Living Wall Units

## “Angolo”

Self-Contained Living Wall Ecosystem Unit  
Supports *Advanced Human Habitat* “AHH...!”

### Advanced Features

- Modular 8' Corner Unit
- 16 sq. ft of Rainforest Plant & Moss Area
- 5 Biome High-Order EcoSystem
- Canopy, Terrestrial & Aquatic Fauna Habitats
- Built-in Full-Spectrum Light Source
- Self-Contained Water Purification System

*Invigorate any space with pPodLite—easy-to-install PeapodLife Building EcoSystem & Technology products suitable for homes, offices, public & retail spaces, and more.*

### “AHH...!” Benefits

- Improve indoor air quality; feel and perform better. Extend the reach of your ecosystem to other rooms via *umbilicals* and make your building come to life.
- Grow almost anything! Orchids, moss, even organic food thrive in our *Zero-Nutrient EcoSystem*. No soil-based, hydroponic or other living wall can compare.
- Save money on air filters. Open to airflow, root systems filter, clean and replenish the air around you more naturally and healthily than HVAC systems.
- Perfect for home, condo, office, retail boutique, health & wellness facility, school or public space; anywhere you or others work, rest or play.
- More impact for less compared to remodeling; better than hanging art or an artificial living wall; pPodLite Muro is a cost-effective way to improve any space.
- An ecosystem is an *appreciating asset* which adds tangible value to your property. Stand out from the crowd with a level of “wow!” you can feel.
